

Loving Touch Animal Center

Annual Health Screen Consent Form

As part of _____ annual vaccination program, we will give him/her a thorough physical exam. This procedure allows us to determine the overall physical health of _____. It allows us to examine him/her for problems which may be considered breed specific. This simply means that certain dogs and cats are pre-disposed to certain health problems.

Our physical examination will help alert you to potential problems which may occur. The physical exam, however, does not allow us to determine the general health of the internal organs. We need to be sure the liver, kidneys, etc. are functioning properly as well. Only a blood screen will do that. This short blood work panel will detect basic liver and kidney problems, as well as check for diabetes. We recommend this screening for all pets 2 years of age and older. It can be done using the same blood which has been pulled for your dog's annual occult heartworm test. As in all health evaluations, early detection is the key as it allows for more and better treatment options.

Yes, complete the recommended procedure at this time.

No, I wish to decline this procedure at this time
